1. Where should `script` tags be located in an HTML document?

.....
.....

2. What selector should be used to select a paragraph over 3, including the second one?

```
<div>
  <p>Do not select me</p>
  <p>Select me</p>
  <p>Do not select me</p>
  <p>Do not select me</p>
  <p>Select me</p>
  <p>Do not select me</p>
  <p>Do not select me</p>
  <p>Select me</p>
  <p>Do not select me</p>
  <p>Do not select me</p>
  <p>Select me</p>
  <p>Do not select me</p>
  <p>Do not select me</p>
</div>
```

.....

3. Give 3 input types introduced in HTML5:

-
-
-

4. Which DOM method should one use to bind code to an event?

.....
